

All SELENA clocks / timers have internal piezo buzzers included, however their sound power is appropriate only for a quiet office environment. In an industrial, noisy installation the High and Medium power models are more suitable.

NOTE: High and Medium Power horns / buzzers require either an external DC power supply or the option # 729PS ordered with the SELENA clock. This option provides internal power supply for the horns.

In all cases, if the clock or timer is to control a horn / buzzer ( timer, counter, temp. alarm etc. ) it may be necessary to order the clock with installed option # 727 ( internal Relay ). Please consult the Customer Service for help.

**Option # 729HP High Power  
8 Inch All-Weather Alarm Horn/Buzzer/Siren**

115 dB sound, 20 Watts power  
5" x 8" ABS plastic  
6-15VDC
